

The New 6kg & 11kg Refillable RV Bottle

The RV refillable bottle is an LPG upright bottle designed for the leisure market.

When travelling abroad the RV Bottle can be filled with ease with the aid of a simple LPG filler gun adapters.

Available from and simply installed by your local dealer, you can just pull up at one of the thousands of Autogas Service Stations throughout the UK and Europe and fill up, just like filling your car.

If you have a twin bottle system, not only will it fill up the empty but also will top up the spare bottle. Simply pay for the gas that you use and save money.

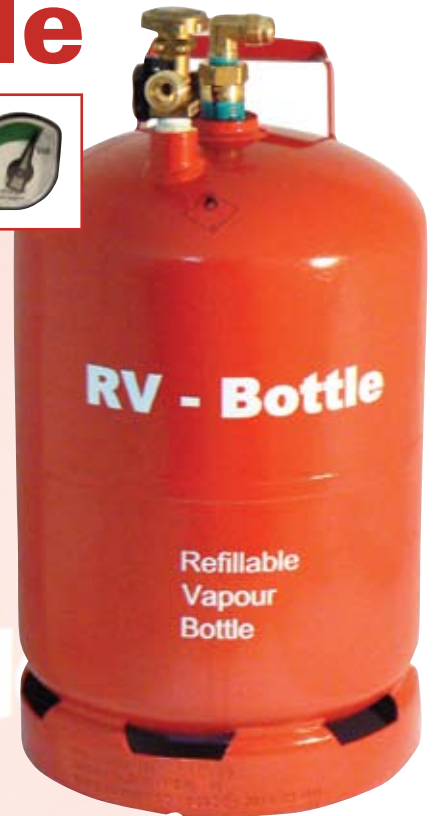

● **Available in 6kg & 11kg sizes.**

The RV Bottle can be easily installed as a one bottle setup with the option of adding a second bottle later if required.

Easy to remove from one vehicle and transfer to a another if the owner decides to change vehicle.

Each bottle is fitted with a unique set of safety valves which incorporates an automatic over fill protection device to limit the bottles filling to 80% as well as a manual off-take valve with built in safety valve.

The RV Bottle also incorporates a fitted liquid contents gauge, the gauge is only to give an indication of content in the bottle and is not an exact measurement.

RV Bottle Standard: PI

Autogas in the UK is 90% Propane, however on the continent, a small amount of Butane is added. If you are already using Propane you can convert your existing regulator with a simple brass adapter that fits the RV Bottle offtake valve. For newer 2002 vans fitted with factory fitted 30mb regulators then simply change the pigtail to suit with one of the purpose designed pigtails to fit the RV Bottle.
